Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, 8-17, 19-20, drawn to a subject matter of changing compression method or compression rate based on the congestion level of the network, classified in class 382, subclass 232 and/or class 358, subclass 246.02;
 - II. Claims 5-6, drawn to a switching device comprising an USB controller, classified in class 710 subclass 62 and /or 316;
 - III. Claim 7, drawn to a subject matter of manipulating mouse coordinates or mouse cursor by calculating the difference between the received mouse coordinates and the previous received mouse coordinates, classified on class 715, subclass 856; and
 - IV. Claims 18 and 21, drawn to a subject matter of converting mouse coordinates using operation screen size and computer screen resolution, classified in class 345 subclass 157.

2. The inventions are distinct, each from the other because of the following reasons:

Each of Inventions I-IV are related as subcombinations disclosed as usable together in single combination. The subcombinations are distinct from each other if they are shown to separately usable. In this case, (a)Invention I has a separate utility such as changing compression method or compression rate based on the congestion level of the network that is not utilized in each of Inventions II-IV; (b)Invention III has a separate utility such as manipulating mouse coordinates or mouse cursor by calculating the difference between the received mouse

coordinates and the previous received mouse coordinates that is not utilized in each of Inventions I-II, and IV; and (c) Invention IV has a separate utility such as converting mouse coordinates using operation screen size and computer screen resolution that is not utilized in each of Inventions I-III. See M.P.E.P. §806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duy M. Dang whose telephone number is 571-272-7389. The examiner can normally be reached on Monday to Friday from 6:00AM to 2:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew C. Bella can be reached on 571-272-7778. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
